SUBJECT: Request for Permission to Conduct a Follow-Up Interview with BDRRMO Staff for Thesis Feature Development

Dear Hon. Mayor Strike B. Revilla,

Good day,

We, the undersigned undergraduate researchers from Cavite State University – Bacoar City Campus, Department of Computer Studies, respectfully write to request permission to conduct a follow-up research interview with the designated staff and/or head of the Bacoar City Disaster Risk Reduction and Management Office (BDRRMO).

This request is in connection with our undergraduate thesis study titled FloodSense: An Augmented Reality Mobile Application with Machine Learning-Based Flood Susceptibility Mapping for Bacoar City, which has undergone its title defense and is currently in the revision phase incorporating panel recommendations prior to final approval.

An initial Key Informant Interview with BDRRMO was previously conducted on May 12, 2026, which confirmed the institutional gap in public-facing flood information and validated the community need for the proposed system. Following the panel's feedback, four additional action features were recommended for inclusion Safety Status Check, Action Checklist, Find Nearest Evacuation Center, and Shareable Susceptibility Report to transition the app from passive awareness to active guidance.

This follow-up interview aims to gather the institutional data and operational context needed to implement these features accurately and in alignment with BDRRMO's official protocols, including the official evacuation center list, evacuation procedures, and preferred plain-language safety messaging per susceptibility level.

All information gathered will be handled with strict confidentiality, used solely for academic purposes, and properly attributed to BDRRMO. We humbly request your kind approval to coordinate with their staff at a time most convenient to them, and we remain grateful for your continued support of this study.

Respectfully yours,

Reymart V. Goc-ong
Martin Lorenz Juanites
Romar T. Pulao
